

Distribution crate 60x40x18

The TBA distribution crate is the ideal choice for transporting food, hot parts and other sensitive materials. Thanks to its sophisticated perforations, it ensures smooth air circulation, helping to reduce condensation and prevent moisture build-up. Excess liquids can easily drain away, contributing to a clean and safe transport environment.

The crate allows for quick visual inspection of the contents, making it easy to handle and identify goods without having to open them. It is made of material resistant to oils, resins and alkalis, while allowing for easy and thorough cleaning that meets strict hygiene requirements.

A great advantage is their stackability - full containers can be stacked safely, while empty ones slide into each other thanks to a clever rotating system, saving space considerably during reverse logistics. Lightweight, robust and practical - the ideal solution for demanding operations.

Product code: 975575

Number of pieces on the pallet: 76

Technical specification

Features:

Colour	grey
Material	HDPE
Weight	1.88 kg

Inner dimensions

Internal dimension length	55 cm
Internal dimension width	35 cm
Internal dimension height	17 cm
